DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-5, 8-9, 13-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is confusing for the duplicate recitation of "the second roof element". See claim 13 also.

Claim 5 is vague in "connecting" apparently missing terms.

Claim 8 lacks antecedent to "slider", found in claim 7.

Claims 13 -18 are incorrect as claim 1 is not directed to a motor vehicle, but to a roof subcombination.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the slider being lockable in said inserted and extended positions, claim 8, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a

drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Slider being lockable in said inserted and extended positions.

Allowable Subject Matter

5. Claims 1-3, 6-7, 10-12 are allowed.

6. Claims 4-5, 8-9, 13-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The claims are deemed to be directed to the rod and guide mechanism of the roof. While no mechanism is disclosed capable of raising the rear roof element 6 from either of the positions of figures 3 & 4 or alternatively 5 to the positions of figures 6 and 7 and particularly no mechanism

Art Unit: 3612

is disclosed for raising the rod 28 overcenter from figure 6 to figure 7, this is not deemed to be a fatal flaw as only the rod linkage and sliding guide mechanism is claimed. Further, reference of record to Biecker et al. lack the double rocker structure and reference to Dinter et al. lack both the double rocker and connecting rod 28. Reference to Guillez et al. have the double rocker 6/7 and connecting rod 22, but lack the coupling to one of the mechanism connecting rods 16/22.
